Awards	xvii
Plenary Lectures	
Development of chemical sensors using microfabrication and micromachining techniques	1
Q. Wu, K.-M. Lee and C.-C. Liu (Cleveland, OH, USA)	
New developments and applications of gas sensors in Japan.	7
S. Matsuura (Minoo, Japan)	
Trends in biosensor research and development.	12
I. Karube and K. Yokoyama (Tokyo, Japan)	
From hydrogen sensors to olfactory images — twenty years with catalytic field-effect devices.	16
I. Lundström, C. Svensson, A. Spetz, H. Sundgren and F. Winquist (Linköping, Sweden)	
Oral Presentations	
Electrode materials for zirconia sensors working at temperatures lower than 500 K (Invited)	27
M. Kleitz, T. Iharada (Saint Martin d'Hères, France), F. Abraham, G. Mairesse (Villeneuve d'Ascq, France) and J. Fouletier (Saint Martin d'Hères, France)	
Platinum-stabilized zirconia composite solid oxide oxygen gas sensor	31
O. Yamamoto (Tsu, Japan), Y. Chujo, K. Aoki (Shizuoka, Japan) and T. Furuichi (Tsu, Japan)	
Limiting current type oxygen sensor using new rate-determining method	34
K. Kaneyasu, T. Nakahara and T. Takeuchi (Kanagawa, Japan)	
The effect of electrode materials on the response of oxygen sensors and the electrode kinetics	38
K. Eguchi, T. Inoue, M. Ueda, J. Kamimae and H. Arai (Fukuoka, Japan)	
Planar type of limiting current oxygen sensor.	41
K. Ishibashi, T. Kashima and A. Asada (Tokyo, Japan)	
A MOSFET type sensor for oxygen sensing using LaF ₃ as a gate material.	45
S.-K. Choi (Kyoung-Ki, South Korea), C. W. Yi, W. I. Cho, B. W. Cho, J. B. Ju, K. S. Yun (Seoul, South Korea) and N. Yamazoe (Fukuoka, Japan)	
Thin film air-fuel ratio sensor.	49
H. Kondo, K. Saji, H. Takahashi and M. Takeuchi (Aichi, Japan)	
Fabrication of a pH-sensitive microarray electrode and applicability to biosensors (Invited).	53
M. Nishizawa, T. Matsue and I. Uchida (Sendai, Japan)	
Amperometric ammonium ion sensor and its application to biosensors.	57
Y. Yamamoto (Kyoto, Japan) and M. Senda (Fukui, Japan)	
Electrodeposition of glucose oxidase for the fabrication of miniature sensors	61
D. J. Strike, N. F. de Rooij and M. Koudelka-Hep (Neuchâtel, Switzerland)	
Achievement of direct electron transfer between glucose oxidase and an electrode by adsorption of hydroquinonesulfonate on the enzyme	65
H. Yoneyama and Y. Kajiya (Osaka, Japan)	
Catechol sensor based on ascorbate oxidase immobilized polymer-modified graphite electrode	68
T. Imato, H. Morioka (Fukuoka, Japan) and W. R. Heineman (Cincinnati, OH, USA)	
Use of the avidin-biotin system for immobilization of an enzyme on the electrode surface	73
J. Anzai, T. Hoshi, S. Lee and T. Osa (Sendai, Japan)	
Concentration-step amperometric biosensors using thin enzyme reactors.	76
S. Uchiyama and S. Suzuki (Saitama, Japan)	

Electrode processes on an enzyme embodied electrode	79
S. Yamauchi, M. Yaoita, F. Matsumoto, T. Yokoyama (Saitama, Japan) and Y. Ikariyama (Yokohama, Japan)	
Humidity sensors using chemically modified polymeric materials (Invited).	82
Y. Sakai (Matsuyama-shi, Japan)	
Fabrication of porous polymeric film for humidity sensing	86
C.-B. Park, Y.-H. Lee and S.-B. Yi (Taedok Science Town, South Korea)	
A thin film polyimide based capacitive type relative humidity sensor	89
T. Kuroiwa, T. Hayashi, A. Ito (Fujisawa, Japan), M. Matsuguchi, Y. Sadaoka and Y. Sakai (Matsuyama, Japan)	
Humidity sensing characteristics of a limiting current type planar oxygen sensor for high temperatures.	92
H. Yagi and K. Ichikawa (Aichi, Japan)	
Sensitivity of phase velocity of a composite ZnO plate to humidity	96
M. Sato and T. Yamamoto (Ishinomaki, Japan)	
Humidity sensitive characteristics of the MO-WO ₃ (M=Mg, Zn, Ni, Mn) system	100
N. Ichinose (Tokyo, Japan)	
Manufacture and examination of various spin-on glass films with respect to their humidity-sensitive properties.	104
J. Lin, M. Heurich and E. Obermeier (Berlin, Germany)	
Humidity sensor using sol-gel-derived silica coating on quartz crystal	107
H.-T. Sun, Z.-T. Cheng, X. Yao (Xi'an, China) and W. Wlodarski (Melbourne, Vic., Australia)	
Sol-gel produced humidity sensor	111
G. Vaivars, J. Pitkevičs and A. Lūsis (Rīga, Latvia)	
YSZ oxygen sensor for lean burn combustion control system	114
D. H. Yun, D. I. Kim and C. O. Park (Taejeon, South Korea)	
Oxygen gas sensing properties of undoped and Li-doped SnO ₂ thin films.	117
G. Sberveglieri, G. Faglia, S. Groppelli, P. Nelli and C. Perego (Brescia, Italy)	
Response and electrode reaction of zirconia sensors in H ₂ -H ₂ O gas atmosphere	121
J. Mizusaki, H. Tagawa (Yokohama, Japan), K. Isobe, I. Koshiro, M. Tajika and K. Hirano (Tokyo, Japan)	
Mechanism of hydrogen sensing by Pd/TiO ₂ Schottky diodes	125
H. Kobayashi, K. Kishimoto, Y. Nakato and H. Tsubomura (Osaka, Toyonaka, Japan)	
Effects of diffusivity of hydrogen and oxygen through pores of thick film SnO ₂ -based sensors on their sensing properties	128
Y. Shimizu, Y. Nakamura and M. Egashira (Nagasaki, Japan)	
A new materials design method on porous ceramics in chemical sensors	132
Z. Zhou and J. Chen (Beijing, China)	
Theory of gas sensors (Invited)	135
A. D. Brailsford, M. Yussouff and E. M. Logothetis (Dearborn, MI, USA)	
Effect of carrier gas on response of oxide semiconductor gas sensor	139
M. Sriyudthsak, L. Promsong and S. Panyakeow (Bangkok, Thailand)	
Specific palladium and platinum doping for SnO ₂ -based thin film sensor arrays.	143
K. D. Schierbaum, J. Geiger, U. Weimar and W. Göpel (Tübingen, Germany)	
Low concentration ammonia detection by LiTaO ₃	148
A. D'Amico (Rome, Italy), M. Faccio, G. Ferri, P. P. Ponti (L'Aquila, Italy), G. Savelli (Perugia, Italy) and N. Spreti (L'Aquila, Italy)	
YSZ/Ag potentiometric sensor for reducing gas detection	151
H. Kaneko, H. Taimatsu, Y. Miyoshi, K. Kawanaka and T. Kusano (Akita, Japan)	
A low power integrated catalytic gas sensor.	155
P. Krebs and A. Grisel (Neuchâtel, Switzerland)	
In ₂ O ₃ -based gas sensors	159
S. N. Malchenko, Y. N. Lychkovsky and M. V. Baykov (Minsk, Belarus)	
Amperometric biosensing of heavy metal ions using a hybrid type of apoenzyme membrane in flow streams	162
I. Satoh (Kanagawa-ken, Japan)	

Electrical communication of polyethylene glycol-modified glucose oxidase in carbon paste and its application to the assay of glucose	166
S. Yabuki, F. Mizutani and T. Katsura (Tsukuba, Ibaraki, Japan)	
Luminescent biomonitoring of benzene derivatives in the environment using recombinant <i>Escherichia coli</i>	169
Y. Ikariyama, S. Nishiguchi, E. Kobatake, M. Aizawa (Yokohama, Japan), M. Tsuda and T. Nakazawa (Yamaguchi, Japan)	
A prototype biosensor based on transport proteins: electrical transducers applied to lactose permease	173
D. Ottenbacher, F. Jähnig and W. Göpel (Tübingen, Germany)	
Immobilization and activity of Concanavalin A on tantalum pentoxide and silicon dioxide surfaces.	176
F. J. B. Kremer, J. F. J. Engbersen, J. Kruise, P. Bergveld, D. A. J. Starmans, J. Feijen and D. N. Reinhoudt (Enschede, Netherlands)	
Amperometric biosensors based on three-dimensional hydrogel-forming epoxy networks (Invited).	180
A. Heller, R. Maidan and D. Wang (Austin, TX, USA)	
Electrochemical luminescence-based homogeneous immunosensor	184
M. Tanaka, S. Kamiya, A. Shibue, K. Namba (Ichikawa, Chiba, Japan), Y. Ikariyama and M. Aizawa (Yokohama, Kanagawa, Japan)	
Piezoelectric crystal immunosensor for sensitive detection of methamphetamine (stimulant drug) in human urine	188
N. Miura, H. Higobashi, G. Sakai (Fukuoka, Japan), A. Takeyasu (Yamaguchi, Japan), T. Uda (Hiroshima, Japan) and N. Yamazoe (Fukuoka, Japan)	
Studies in the immuno fluoro sensing system.	192
J. Miyazaki and T. Mitsumata (Osaka, Japan)	
A novel approach for toxicity sensing using hepatocytes on a collagen-patterned plate	196
S. Miyamoto, A. Ohashi, J. Kimura (Kawasaki, Kanagawa, Japan), S. Tobe and T. Akaike (Yokohama, Kanagawa, Japan)	
Role of membrane media in potentiometric selectivity of anion carrier-based ion-selective electrodes	200
A. Jyo, R. Minakami, Y. Kanda and H. Egawa (Kumamoto, Japan)	
Application of electroinactive polypyrrole film to the pH sensor electrode	205
T. Osaka, T. Fukuda, H. Kanagawa, T. Momma (Tokyo, Japan) and S. Yamauchi (Saitama, Japan)	
Improvement of structural instability of the ion-sensitive field-effect transistor (ISFET)	209
K.-M. Chen, G.-H. Li, L.-X. Chen and Y. Zhu (Beijing, China)	
Rear-gate ISFET with a membrane locking structure using an ultrahigh concentration selective boron diffusion technique.	212
H. Yagi and T. Sakai (Kawasaki, Japan)	
ISFET combination pH/pF for the fast determination of very low fluoride concentrations using acid solutions.	217
W. Moritz (Berlin, Germany), B. H. van der Schoot, N. F. de Rooij (Neuchâtel, Switzerland), H. H. van den Vlekkert and H. C. G. Ligtenberg (Roden, Netherlands)	
Development of chemically modified ISFETs as durable sensors for continuous flow measurements	221
U. H. Verkerk (De Lier, Netherlands), H. H. van den Vlekkert (Roden, Netherlands), D. N. Reinhoudt, J. F. J. Engbersen, G. W. N. Honig and H. A. J. Holterman (Enschede, Netherlands)	
Electrochemical counting of photon number using the assembled monolayer film of azo compound (Invited).	226
K. Morigaki, Z. F. Liu, K. Hashimoto and A. Fujishima (Tokyo, Japan)	
A new probe for measuring electrolytic conductance.	230
W. Olthuis, A. Volanschi, J. G. Bomer and P. Bergveld (Enschede, Netherlands)	
Rate equation simulation of the height of Schottky barriers at the surface of oxidic semiconductors.	234
T. S. Rantala, V. Lantto and T. T. Rantala (Oulu, Finland)	
Electronic characterization of ZnO/CuO heterojunctions	238
K.-K. Baek and H. L. Tuller (Cambridge, MA, USA)	
A new type of mixed potential sensor using a thick film of beta-alumina.	241
R. Lalauze, E. Visconte (Saint-Etienne, France), L. Montanaro (Turin, Italy) and C. Pijolat (Saint-Etienne, France)	
Thermocatalytic sensors with Pd-Pt-Al ₂ O ₃ catalyst	244
S. V. Baran, G. A. Branitsky and M. I. Ivanovskaya (Minsk, Belarus)	

Application of the interfacial instability to chemical sensors. The simultaneous monitoring of high concentrations of hydrogen ions and sulfate ions	248
A. Ishihara and S. Asakura (Yokohama-shi, Kanagawa-ken, Japan)	
High sensitivity and selectivity methane gas sensors doped with Rh as a catalyst.	252
D.-D. Lee, W.-Y. Chung and B.-K. Sohn (Taegu, South Korea)	
Device with semiconductor gas sensor for alcohol vapour detection in an exhaled air sample	256
N. P. Maksimovich and L. E. Yeremina (Kiev, Ukraine)	
Improvements in Ga_2O_3 sensors for reducing gases.	259
M. Fleischer and H. Meixner (Munich, Germany)	
Stability, sensitivity and selectivity of tungsten trioxide films for sensing applications	264
D. J. Smith, J. F. Vetelino, R. S. Falconer and E. L. Wittman (Orono, ME, USA)	
Solid proton conductors as room-temperature gas sensors	269
J. Kleperis, G. Vaivars, G. Bajārs, A. Kranevskis, A. Lūsis and G. Vītiņš (Riga, Latvia)	
Thin films of non-stoichiometric perovskites as potential oxygen sensors.	272
M. L. Post, B. W. Sanders and P. Kennepohl (Ottawa, Ont., Canada)	
Crowned and liquid-crystalline phthalocyanines as gas-sensor materials.	276
J. D. Wright, P. Roisin, G. P. Rigby (Canterbury, Kent, UK), R. J. M. Nolte (Nijmegen, Netherlands), M. J. Cook (Norwich, UK) and S. C. Thorpe (Sheffield, UK)	
Preparation and characterization of an optically detectable H_2 gas sensor consisting of Pd/MoO_3 thin films.	281
J. Hamagami, Y. Oh, Y. Watanabe and M. Takata (Niigata, Japan)	
Wavelength-modulated optical gas sensors.	284
T. Chen (Zug, Switzerland)	
A fiber-optical sensor for polynuclear aromatic hydrocarbons based on multidimensional fluorescence.	288
U. Panne and R. Niessner (Munich, Germany)	
Development of a surface acoustic wave sensor array for the detection of methanol in fuel vapours.	293
J. Reichert, W. Coerdts and H. J. Ache (Karlsruhe, Germany)	
Supramolecular detection of solvent vapours with QMB and SAW devices.	297
F. L. Dickert, Th. Bruckdorfer, H. Feigl, A. Haunschild, V. Kuschow (Erlangen, Germany), E. Obermeier (Berlin, Germany), W.-E. Bulst, U. Knauer and G. Mages (Munich, Germany)	
Cavitands as selective materials for QMB sensors for nitrobenzene and other aromatic vapours.	302
P. Nelli (Brescia, Italy), E. Dalcanale (Parma, Italy), G. Faglia, G. Sberveglieri (Brescia, Italy) and P. Soncini (Novara, Italy)	
Fiber-optic sensor system for hydrocarbon vapors.	305
E. F. Carome, G. Fischer and V. Kubulins (Cleveland, OH, USA)	
Electrochemical sensor for viable microbial cell concentration based on a functional polymer that captures microorganisms alive	309
N. Kawabata and K. Teramoto (Kyoto, Japan)	
Development of rapid detection system for allergic reaction using rat basophilic leukemia (RBL-1) cells.	312
N. Nakamura, S. Kumazawa, K. Sode and T. Matsunaga (Tokyo, Japan)	
Development of a needle-type glucose sensor based on a titanium dioxide oxygen electrode for the artificial pancreas	315
S. Ikeda, M. Hara, Y. Hishida, M. Kimura and K. Ito (Nagoya, Japan)	
Ferrocene-mediated needle-type glucose sensor covered with newly designed biocompatible membrane	319
M. Sakakida, K. Nishida, M. Shichiri (Kumamoto, Japan), K. Ishihara and N. Nakabayashi (Tokyo, Japan)	
Microdialysis implemented in the design of a system for continuous glucose monitoring	323
T. Laurell (Lund, Sweden)	
Sensor array figures of merit: definitions and properties (Invited)	327
F. A. M. Davide (L'Aquila, Italy), C. Di Natale and A. D'Amico (Rome, Italy)	
A modular miniaturized chemical analysis system	333
B. H. van der Schoot, S. Jeanneret, A. van den Berg and N. F. de Rooij (Neuchâtel, Switzerland)	
Highly sensitive detection of catecholamine with interdigitated array microelectrodes in HPLC	336
M. Takahashi, M. Morita, O. Niwa and H. Tabei (Tokai, Ibaraki, Japan)	

Integrated blood-gas sensor for pO_2 , pCO_2 and pH	340
Ph. Arquint, A. van den Berg, B. H. van der Schoot, N. F. de Rooij (Neuchâtel, Switzerland), H. Bühler, W. E. Morf and L. F. J. Dürselen (Zürich, Switzerland)	
Heat-conduction microsensor based on silicon technology for the analysis of two- and three-component gas mixtures	345
G. Pollak-Diener and E. Obermeier (Berlin, Germany)	
Light-addressable potentiometric (LAP) gas sensor	348
Y. Ito, K. Morimoto and Y. Tsunoda (Saitama-Ken, Japan)	
Development of odour-sensing system using an auto-sampling stage.	351
J. Ide (Kawasaki, Kanagawa, Japan), T. Nakamoto and T. Moriizumi (Tokyo, Japan)	
Effect of additives and particle size on the sensitivity of SnO_2 -based sensors for offensive-odor components	355
Y. Nishizaka, C. Yokoyama, K. Inumaru, T. Okuhara and M. Misono (Tokyo, Japan)	
Application of Teflon particle column to an odor-sensing system	358
H. Matsuoka, Y. Yamada, S. Dousaki, Y. Nemoto (Koganei, Tokyo, Japan), A. Shinohara and A. Satoh (Ota-ku, Tokyo, Japan)	
Application of MOS sensors for determination of hydrogen content in solids	362
A. Babichev, N. Babulevich, S. Lasarev and S. Yakimov (Moscow, Russian Federation)	
New principles of amperometric enzyme electrodes and of reagentless oxidoreductase biosensors.	366
H.-L. Schmidt, F. Gutberlet and W. Schuhmann (Freising-Weihenstephan, Germany)	
Piezoelectric admittance-based sensing of electrolyte solutions by montmorillonite clay film-coated quartz-crystal oscillators.	372
N. Oyama, K. Takada, T. Tatsuma, K. Naoi (Koganei, Tokyo, Japan), T. Okajima and T. Ohsaka (Midori-ku, Yokohama, Japan)	
Photoresponsive planar bilayer lipid membranes containing azobenzene amphiphilic derivatives	376
H. Yamaguchi and H. Nakanishi (Kawasaki, Japan)	
Detection of intercalation behaviours of dyes in DNAs using a quartz-crystal microbalance.	380
Y. Okahata, Y. Matsuzaki and K. Ijio (Meguro-ku, Tokyo, Japan)	
Surface plasmon resonance study for the detection of some chemical species	384
K. Ideta and T. Arakawa (Iizuka, Fukuoka, Japan)	
Development of high-performance solid-electrolyte sensors for NO and NO_2 (Invited)	387
N. Miura, S. Yao, Y. Shimizu and N. Yamazoe (Kasuga, Fukuoka, Japan)	
A solid inorganic gel membrane sensor for mercury	391
S. K. Srivastava, V. Sahgal and H. Vardhan (Roorkee, India)	
On-wafer fabricated free-chlorine sensor with ppb detection limit for drinking-water monitoring	396
A. van den Berg, A. Grisel (Neuchâtel, Switzerland), E. Verney-Norberg (Ecully, France), B. H. van der Schoot, M. Koudelka-Hep and N. F. de Rooij (Neuchâtel, Switzerland)	
Sensing behaviour of semiconducting metal oxides for the detection of organophosphorus compounds.	400
S. W. Oh, Y. H. Kim, D. J. Yoo, S. M. Oh and S. J. Park (Seoul, South Korea)	
Highly sensitive ozone sensor	404
T. Takada, K. Suzuki and M. Nakane (Yodogawa-ku, Osaka, Japan)	
Microelectrochemical sensor for nitrogen oxides	408
M. J. Tierney, H.-O. L. Kim, M. Madou and T. Otagawa (Menlo Park, CA, USA)	
Characteristics of the substituted metal phthalocyanine NO_2 sensor.	412
K. Moriya, H. Enomoto and Y. Nakamura (Osaka, Japan)	
Substituted phthalocyanine gas sensors	416
A. Cole, R. J. McIlroy, S. C. Thorpe (Sheffield, UK), M. J. Cook, J. McMurdo (Norwich, UK) and A. K. Ray (Sheffield, UK)	
Optical humidity and ammonia gas sensor using calcein-based films	420
Y. Sadaoka, Y. Sakai and Y. Murata (Matsuyama, Japan)	
An optochemical sensor for Cd(II) and Hg(II) based on a porphyrin immobilized on Nafion® membranes	424
A. Morales-Bahnik, R. Czolk, J. Reichert and H. J. Ache (Karlsruhe, Germany)	

Development of an optical-fibre sensor using a functional membrane.	427
N. Takai, T. Hirai (Tokyo, Japan), I. Sakuma, Y. Fukui (Saitama, Japan), A. Kaneko and T. Fujie (Tokyo, Japan)	
A shear-horizontal SAW device as a pH monitor.	429
J. Kondoh, S. Shiokawa (Shizuoka, Japan) and Z. Georgiev (Sofia, Bulgaria)	
Measurement of relative adhesion and surface properties of polyimide films using a surface acoustic wave sensor	432
D. W. Galipeau, J. F. Vetelino (Orono, ME, USA) and C. Feger (Yorktown Heights, NY, USA)	
Improved acoustic-plate-mode biosensor	437
J. C. Andle, J. T. Weaver, D. J. McAllister, F. Josse and J. F. Vetelino (Orono, ME, USA)	
Odor sensing by semiconductor metal oxides (Invited).	443
M. Egashira and Y. Shimizu (Nagasaki, Japan)	
New approach for non-destructive sensing of fruit taste.	447
I. Taniguchi, Y. Yonehara, K. Masuda, Y. Hirakawa and M. Uemura (Kumamoto, Japan)	
Quality evaluation on green tea.	451
H. Horie, S. Fukatsu, T. Mukai, T. Goto (Shizuoka, Japan), M. Kawanaka and T. Shimohara (Fukuroi, Japan)	
Mixture analysis of organic solvents using nonselective and nonlinear Taguchi gas sensors with artificial neural networks	455
X. Wang, J. Fang, P. Carey and S. Yee (Seattle, WA, USA)	
An integrated array of multiple thin-film metal oxide sensors for quantification of individual components in organic vapor mixtures	458
X. Wang, S. Yee and P. Carey (Seattle, WA, USA)	
Simulation system of indoor environmental control using tin oxide gas sensor.	462
T. Oyabu, M. Honda (Toyama, Japan), T. Amamoto and Y. Kajiyama (Osaka, Japan)	
Development of catalytic electrochemical gas sensor for arsine	466
N. Funazaki, S. Kume, A. Hemmi, S. Ito, Y. Asano and S. Yamashita (Tokyo, Japan)	
Capacitive-type gas sensor for the selective detection of carbon dioxide	470
T. Ishihara, K. Kometani, Y. Mizuhara and Y. Takita (Oita, Japan)	
CO ₂ -sensing characteristics of SnO ₂ element modified by La ₂ O ₃	473
N. Mizuno, T. Yoshioka, K. Kato and M. Iwamoto (Sapporo, Japan)	
CO ₂ detection with lithium solid electrolyte sensors	476
N. Imanaka, T. Murata, T. Kawasato and G. Adachi (Suita Osaka, Japan)	
Rare earth metal-oxide-based CO ₂ gas sensor	480
T. Sugai and T. Matsuzawa (Tokyo, Japan)	
CO ₂ sensors using BaCeO ₃ -based ceramics	483
T. Hibino and H. Iwahara (Nagoya, Japan)	
Development of semiconductor fluorocarbon gas sensor.	486
T. Nomura, T. Amamoto, Y. Matsuura and Y. Kajiyama (Osaka, Japan)	

Please note that the page numbering for these Proceedings is continuous throughout Volumes B13 and B14, and Author and Subject Indexes will be published at the end of Volume B14.
